ZeroDown® Software and Triangulate announce agreement to deliver business assurance with high availability cloud solutions in EMEA

ZeroDown® Software today announced an agreement with Triangulate Distribution Ltd., to deliver and support cloud-enabled high availability solutions in Europe, the Middle East and Africa. The integration of ZeroDown's Always Available™ software into Triangulate's cloud consultancy services will provide business assurance for customers who are seeking to deploy applications to private, hybrid, and public cloud infrastructures such as Microsoft Azure, Azure Stack, AWS, Oracle, and more.

ZeroDown Software's patented high availability architecture empowers organizations of any size to move their applications to hybrid and multi-cloud environments with zero downtime. By enabling active-active availability across multiple sites or zones, ZeroDown's solution cuts downtime to zero while keeping workloads available and transaction-complete before, during and after migration. This adds an essential safety net to customers' cloud journeys, eliminating risks such as single points of failure and data loss. In the event of an outage, the user's session automatically moves to a mirrored active instance with full transaction integrity, providing unique failover or fallback capabilities for app migration and beyond.

Triangulate is an EMEA distributor of products and services that significantly reduce the cost and increase the speed of application and device migration to either Windows 10, Azure, Azure Stack, AWS, Google, Alibaba or other public/hybrid clouds.

"We are delighted to announce the integration of ZeroDown Software's high availability solution into Triangulate's core set of cloud solutions to bring business assurance to the EMEA marketplace," said Alan Gin, ZeroDown Software co-founder, and CEO.

"Triangulate's technical expertise with on-prem deployments, alongside their close relationships with market leading Cloud providers such as Microsoft, makes them a great fit to distribute and provide level one technical support for our HA solution across the region."

“The partnership with ZeroDown® adds unique high availability capabilities to our specialties in migrating applications, legacy applications, and server workloads to the cloud.” said Lee Murray, CEO and Founder, Triangulate Distribution. “The HA solution will enable our partners (CSPs, Systems Integrators and ISVs) to accelerate enterprise application cloud adoption. With this announcement, we look forward to customers taking full advantage of a safe and reliable pathway to hybrid cloud.”

About ZERODOWN® Software

ZERODOWN® Software provides businesses with continuous access to their company data via their Business Continuity as a Service™ solutions and Always Available™ architecture, protecting applications, and transactions in the event of network interruptions that would generally cripple the enterprise.
